

Taylor Morse
Bellingham, WA - Tmorse725@gmail.com - (360) 319-2255

I am passionate about creating efficient, maintainable, and user friendly web apps. I enjoy tackling complex problems and automating business processes. I'm a team player with strong leadership skills, capable of collaborating with others to deliver enterprise level software solutions tailored to business needs.

I hold a strong appreciation for clean, maintainable code, while actively promoting the use of modern stacks to elevate the developer experience. My commitment to continuous learning is complemented by my strength as a proficient problem solver. Rapid issue resolution and seamless onboarding are among my core strengths.

Builders Capital | Puyallup, WA

React, NodeJS, C# ([ASP.NET](#)) and SQL

Senior Front End Software Developer | 02/24 - Present

- Architected and built Builders Capital's next-generation architecture, leveraging Node.js, microservices, and cloud-native patterns to replace legacy systems; established shared component libraries, authentication flows (MFA, JWT, device registration), and scalable CI/CD pipelines to support enterprise-grade software solutions.
- Designed and implemented a modern pricing and loan application platform, replacing legacy Excel-based systems and streamlining workflows.
- Resolved critical performance bottlenecks in the legacy system by implementing modern build optimization techniques, resulting in faster user workflows and improved productivity.

Heritage Bank | Burlington, WA

Java, React and SQL

Software Developer II - Officer | 02/21 - 02/24

- Promoted to Lead Software Developer, managing junior developers and guiding architecture, code quality, and project delivery.
- Expanded the development team from 4 to 14 engineers by leading recruitment efforts, reviewing resumes, conducting technical interviews, and driving a structured onboarding program that accelerated ramp-up time and improved team cohesion.
- Acted as tech lead for multiple business critical internal applications, coordinating infrastructure deployments and presenting implementation plans to the change management board.
- Engineered a robust low-code event handler workflow system, empowering business analysts to independently design and deploy complex business logic, significantly accelerating solution delivery and reducing reliance on developer resources.

Software Developer I | 02/19 – 02/21

- Built the core commercial bank loan origination system, saving the company millions in 3rd party implementations, and increasing profits by automating large portions of the loan process.
- Created Cruise, a full stack low code platform for building internal web applications easily with JSON, web services, and multiple plugins / databases.

Education

Western Washington University Bachelor of Science - **Computer Science** · 2018

Skills

React, Redux, Node.js, Next.js, Typescript, CSS, HTML, ES6, Java, Python, C, Kotlin, SQL, MongoDB, AWS, git, Agile, JIRA, Bitbucket, Project Management, Change Management, Incident Management, CI/CD, Linux, Bash, Responsive Design, Lean, Data Structures and Algorithms, Design Patterns, Webpack, REST Api, HTTP
