

Taylor Morse

Bellingham, WA - Tmorse725@gmail.com - (360) 319-2255

I am passionate about creating **efficient**, maintainable, and user-friendly web apps. I enjoy tackling complex problems and **automating business processes**. I'm a **team player** with strong **leadership** skills, capable of **collaborating** with others to deliver **enterprise-level software** solutions tailored to business needs.

I hold a strong appreciation for clean, **maintainable** code, while actively promoting the use of **modern** stacks to elevate the **developer experience**. My commitment to continuous learning is complemented by my strength as a proficient problem solver. Rapid issue resolution and **seamless onboarding** are among my core strengths.

Builders Capital | Puyallup, WA

[React](#), [NodeJS](#), [C#](#) ([ASP.NET](#)) and [Microsoft SQL Server](#)

Senior Full Stack Software Developer | 02/24 - Present

- **Architected Next-Gen Systems** - Designed and delivered cloud-native **Node.js microservices** to replace legacy systems with scalable, maintainable solutions. Implemented **auto-scaling** App Services and Application Insights.
- **Streamlined Loan Workflows** - Built a pricing and loan platform that cut loan origination and application processing time by **30%+**, improving throughput and borrower experience.
- **Business Process Automation** - Built an automated reconciliation system integrating vendor PO, invoice, and loan draw data. Used fuzzy matching and validation logic to flag discrepancies in real time, **reducing reconciliation** from days to hours and **improving financial accuracy**.
- **Leadership & Collaboration** - Set code quality standards, **mentored** juniors, and partnered with officers and **executives** to align solutions with business needs.

Heritage Bank | Burlington, WA

[Java](#), [React](#) and [Microsoft SQL Server](#)

Software Developer II - Officer | 02/21 - 02/24

- **Core Integration** - Built internal tools on the bank's private network connected directly to the **Fiserv DNA core**; developed **Java-based services** hosted on **Apache Tomcat** with Maven and integrated monitoring through **Grafana** for operational visibility.
- **Leadership & Mentorship** - Promoted to **Lead Developer**, mentoring junior engineers and driving architecture, code quality, and project delivery. Expanded the team from **4 to 14 engineers** by leading recruitment, interviews, and onboarding.
- **Technical Leadership** - Served as **tech lead** on critical applications, coordinating **infrastructure deployments** and presenting to the **change management board**.

Software Developer I | 02/19 - 02/21

- **Loan Origination System** - Built the bank's core **commercial loan origination platform**, saving millions in 3rd-party costs and automating large portions of the loan process.
- **Internal Platforms** - Created "Cruise," a **full-stack low-code platform** for rapid internal web app development using JSON, web services, and multiple plugins/databases.

Education

Western Washington University Bachelor of Science - **Computer Science** - 2018
