Taylor Morse

Bellingham, WA - Tmorse725@gmail.com - (360) 319-2255

I am passionate about creating **efficient**, maintainable, and user-friendly web apps. I enjoy tackling complex problems and **automating business processes**. I'm a **team player** with strong **leadership** skills, capable of **collaborating** with others to deliver **enterprise-level software** solutions tailored to business needs.

I hold a strong appreciation for clean, **maintainable** code, while actively promoting the use of **modern** stacks to elevate the **developer experience**. My commitment to continuous learning is complemented by my strength as a proficient problem solver. Rapid issue resolution and **seamless onboarding** are among my core strengths.

Builders Capital | Remote

React, TypeScript, Node.js, C#/.NET, SQL Server, Azure

Senior Full Stack Software Developer | 02/24–Present

- Led architecture and delivery of a **loan origination and pricing platform**, translating complex financial rules into pricing calculations, scenario modeling, and underwriting controls that reduced loan officer processing time by **over 30%**.
- Built **shared frameworks** across applications, with **metadata-driven pricing, fields, workflows**, and **reusable React components** for complex tables, forms, and layouts.
- Independently architected and built **centralized authentication** to replace MSAL-based authentication across multiple applications, supporting JWT, MFA, trusted devices, session management, and **role-based access control**; guided developers through integration.
- Built a **queue-backed email microservice** using Azure Functions and **durable execution**, supporting reliable asynchronous delivery with retries.
- Implemented scheduled **Azure Data Factory pipelines** to **automate recurring data imports**.
- Drove projects from **requirements through release** on a **remote team**, using written design proposals, **asynchronous code reviews**, and **coordination across time zones** to align developers and business stakeholders.

Heritage Bank | Burlington, WA

Java, React and Microsoft SQL Server

Software Developer I → II | 02/19–02/24

- Built the bank's commercial loan origination platform, **saving millions in third-party costs**, and created "Cruise," a **full-stack low-code platform** for internal applications.
- Developed Java services integrating with **Fiserv DNA** using Tomcat, Maven, and Grafana; **led critical applications**, deployments, and change management reviews.
- Advanced from Developer I to Developer II / Officer and served as **Lead Developer**; mentored engineers and helped **grow the team from 4 to 14** through recruitment, interviews, and onboarding.

Education

Western Washington University Bachelor of Science - **Computer Science** · 2018

Skills

React, Redux, Node.js, Next.js, Typescript, CSS, HTML, ES6, Java, Python, C, Kotlin, SQL, MongoDB, AWS, git, Agile, JIRA, Bitbucket, Project Management, Change Management, Incident Management, CI/CD, Linux, Bash, Responsive Design, Lean, Data Structures and Algorithms, Design Patterns, Webpack, REST Api, HTTP
